WO 2005/007792 PCT/KR2003/001456

Claims

- 1. A process of producing powder including sodium sesquicarbonate and layered silicate, comprising:
- 5 (a) mixing a sodium silicate aqueous solution with a separately prepared sodium bicarbonate aqueous solution to produce a reaction solution;
 - (b) heating the reaction solution to form slurry; and
 - (c) drying the slurry to produce the powder.
- 2. The process as set forth in claim 1, wherein a ratio of SiO₂:Na₂O of sodium silicate in the step of (a) is 2.1:1 3.8:1.
 - 3. The process as set forth in claim 1, wherein the step of (b) is conducted at 100 150 °C.
- 4. The process as set forth in claim 1 or 3, wherein the slurry contains 50 70 % of water in the step of (b).
 - A process of producing powder including sodium sesquicarbonate and layered silicate,
 comprising:
- 20 (a) mixing sodium silicate, sodium bicarbonate, and water with each other to produce a reaction solution;
 - (b) heating the reaction solution to form slurry; and
 - (c) drying the slurry to produce the powder.
- 6. The process as set forth in claim 5, wherein a ratio of SiO₂:Na₂O of sodium silicate in the step of (a) is 2.1:1 3.8:1.

WO 2005/007792 PCT/KR2003/001456

7. The process as set forth in claim 5, wherein the step of (b) is conducted at 100 - 150 $^{\circ}$ C.

8. The process as set forth in claim 5 or 7, wherein the slurry contains 50 - 70 % of water in the step of (b).
